Ahead of the 2020 Presidential Election, vote intention among Texas registered voters is at one of its highest points. Latino registered voters seem to be particularly enthusiastic about the General Election next year. The turn-out gap between Women and Men is about 4 points higher. In 2018, Women played a very important role in the mid-term election giving Democrats a competitive edge. The poll's results are the prelude to a very competitive election given that a vast majority of both Democrats and Republicans intend to vote on Election Day.

Thinking ahead to the November 2020 Presidential election, what would you say the chances are that you will vote in the presidential election and other state offices...

There is still no clear favorite among Democrats in the race towards the White House. There is a two-way tie between Joe Biden and Beto O'Rourke for first place and a three-way-tie for second and third place among Sanders, Castro, and Warren. O'Rourke, however, has a 7-point lead over Joe Biden among Latino registered voters and among Women, while polling identical to Sanders among young voters, a key demographic to win Texas. Among Black voters and Men, Joe Biden has a double-digit advantage over Julian Castro and O'Rourke and Sanders, respectively.

Among the candidates running for President, who are you currently planning to vote for?

None of the candidates for the U.S. Senate race, including Sen. Cornyn enjoy high favorable ratings among Texas' registered voters. Sen. Cornyn only has a 38% favorable impression among registered voters, while Sema Hernandez, M.J. Hegar and Royce West are among the candidates from the Democratic Party that enjoy the highest favorability among registered voters with 26 percent and 24 percent, respectively. A significant hurdle that candidates face is that around two-out-of-five voters have not heard enough about the candidates to have an informed opinion, which opens a significant opportunity for the field to make significant strides among voters' preferences.

Do you have a favorable or unfavorable impression of: U.S. Senator John Cornyn

Methodology: On behalf of Univision News, Latino Decisions partnered with NorthStar Opinion to implement a national survey of Latino registered voters (n=1,043 +/- 3.0%). In addition, an oversample of n=500 Texas Latino registered voters were surveyed and combined with Texas Latinos in the national sample for a total of n=641 Texas Latinos (+/- 3.9%). Finally, a sample of non-Latino Texans (n=504) was implemented and combined with the Texas Latino sample (n=500) for a total Texas statewide sample of n=1,004 (+/- 3.1%). The two Texas components were in partnership with the Center for Mexican American Studies at the University of Houston. Field dates were Aug 31 – Sep 6, 2019. Respondents were all randomly selected from the vote file and given the opportunity to complete the survey via telephone (cell or landline) or to self-complete the survey via email invitation on their phone or computer. All respondents were confirmed to be registered voters and matched against the voter file (TargetSmart). The survey was available in English or Spanish at the discretion of each respondent at point of contact, both phone and email invitations were available in either English or Spanish. Once data collection was complete post-stratification weights were added to ensure that the final sample matched the best known estimates for registered voters from the Census CPS for state, age, gender, education, nativity. For Texas the statewide sample was weighted to match the racial/ethnic demographics of the state (Anglo 53%; Hispanic 33%; black 11%; other 3%). The survey was developed by Dr. Sergio Garcia- Rios, director of polling at Univision, in consultation with Latino Decisions and NorthStar Opinion, and UH Jeronimo Cortina.
