730 University of Houston

UH Overview and Goals

Since its founding in 1927, the University of Houston has evolved from its origins as a “college for working men and women” to a nationally competitive Tier One university that generates more than \$150 million in research annually and educates the people of Houston and the world. Today, UH provides more than 300 academic programs and extensive community and business partnerships. UH is the primary supplier of college-educated workers in the Greater Houston Region, and its research activity fuels the regional/state economy. Located in the energy capital of the world, UH reflects the diversity, vibrancy, and international reputation of the city and state it serves.

As part of the state-supported system of higher education in Texas, UH serves approximately 43,000 students. UH is a Tier One research university, the flagship institution of the University of Houston System, and its principal doctoral degree-granting institution. As such, it has the traditional functions and obligations of a comprehensive research university:

- The full range of undergraduate through doctoral academic programs,
- Nationally recognized quality in its programs and faculty,
- Extensive externally funded basic and applied research, and
- Diverse cultural and public service programs of benefit to the community and the state.

A Metropolitan University with International Influence

Under the leadership of President Renu Khator, the University of Houston has achieved much in recent years as it strengthens its profile as a Tier One university. While keeping its metropolitan focus, UH has transformed into a large, highly selective institution with global reach. In the past eight years, student enrollment has grown from approximately 35,000 to 43,000 students, over 20%. The university now attracts more academically competitive students, as well. UH’s mean SAT score is 1150, almost 100 points higher than eight years ago. UH’s FTIC graduation rate has risen from 43% to 51% and is projected to reach 61% by 2020.

UH is also one of very few Tier One universities the federal government has designated as a Hispanic Serving Institution, which enables the university to compete for federal grants to increase Hispanic student success. In FY 2016, Phi Beta Kappa, the nation’s most prestigious honor society, established a chapter at UH, reflecting the campus’ increasing academic competitiveness.

A Great Value for Students and Investment in Texas

As UH has grown, we have made significant efforts to ensure college affordability and to strategically manage and invest our financial resources. These efforts include:

- UH in 4, which incentivizes students to complete a degree in 4 years through a fixed rate tuition plan;
- Cougar Promise, which provides full coverage of tuition and fees to undergraduates with family incomes of \$45,000 or less;
- More than doubling financial aid to students over the past ten years (\$49 million to \$116 million);
- Implementing performance-based funding, through which the UH colleges are rewarded for improvements in student success and national competitiveness;
- Increasing UH’s endowment by 20% to \$700 million;

Administrator's Statement

85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

730 University of Houston

- Increasing annual giving nearly 150% to \$120 million; and
- Reducing administrative costs (from 10.4% in FY 2000 to 6.8% in FY 2015).

UH has been nationally recognized for its affordability and return on investment for students. The 2014 White House College Scorecard placed UH in the top 2% of 4-year institutions for low tuition, student loan default, and student borrowing. In 2015, U.S. News and World Report ranked UH 11th in graduating students with the least amount of debt. The Princeton Review also named UH a Best Value College. These are distinctions UH works hard to maintain.

Committed to Student Success for a Diverse Population

Increasing the enrollment, retention, and graduation of a diverse student body with exceptional academic qualifications is key to achieving the University of Houston's goal of furthering its position as a Tier One university. To that end, UH has achieved record performance this year in the following key student success measures:

- Total degrees awarded: 9,160
- Freshman first-year retention rate: 86%
- Freshman six-year graduation rate: 51%
- Freshman median SAT: 1150
- Course completion rate: 97%

Improvements in these measures have been achieved by the university's commitment to implementing and investing in initiatives that facilitate student success. These include increasing scholarships, expanding course offerings, enhancing student support services, and improving the curriculum. UH serves a student population that is unique among Texas' public research institutions. No ethnic group constitutes a majority of our students. In FY 2016, the student population was 28% White, 28% Hispanic, 20% Asian-American, 10% African-American, and 10% international. Moreover, many of UH's students are the first generation of their families to attend college, come from economically-disadvantaged households, or work while pursuing their education. As a result, these students often require more support than the traditional college student if they are to graduate on time.

To that end, UH is implementing innovative and effective student success programs. For example, through UH in 4 freshmen are guaranteed a flat tuition rate for four years as long as they earn 30 credit hours per year. During the first two years, freshman participation in UH in 4 has increased from 49% to 62%. These students are also performing better than non-UH in 4 students in key areas of performance:

	UH in 4 (FTIC)	Non-UH in 4 (FTIC)
First-Year Retention Rate	88.1%	84.6%
% Completing 30 SCH in First Year	83.4%	68.3%
Average GPA	3.09	2.97

730 University of Houston

Committed to National Competitiveness: Building upon Recent Success

The University of Houston's goal of maintaining and improving its standing as a Tier One university will occur only if the institution increases external research funding and enhances its academic programs to a level commensurate with the nation's leading public research universities. To that end, the university achieved record highs last year on the following national competitiveness measures:

- Total research expenditures: \$151M
- Number of scholarly citations: 65,166
- Doctorates awarded: 335
- Graduate programs ranked in the top 50 nationally: 9

UH has also achieved success in several other key areas of national competitiveness:

- Since 2012, UH has been identified as a Top American Research University by the Center for Measuring University Performance.
- In the past year, UH has increased its Association of Research Libraries (ARL) ranking from 77th to 65th. ARL members are the nation's most prominent research libraries.
- Since 2008, royalty revenue has grown from \$1.1 million to \$26.0 million.
- In 2016, the National Academy of Inventors ranked UH/UH System among the top 100 university systems for utility patents for the first time.
- Recently, UH has recruited three national academy members as part of the Governor's University Research Initiative.

UH's high level of research productivity requires hiring exceptional faculty in areas of programmatic excellence, particularly in the STEM disciplines, the health sciences, and energy. It also requires investments in buildings, labs, equipment, and other infrastructure that a growing faculty needs to support a nationally competitive research enterprise. To that end, UH is constructing a new Health and Biomedical Sciences Building and launching a \$100 million multi-year capital renewal plan to renovate seven of the university's most important academic buildings (with over 800,000 square feet of space). These projects would not have been possible without the appropriation during the last legislative session of tuition revenue bonds for the Health & Biomedical Sciences Building and increased appropriations of HEAF, which will support the capital renewal plan. Moreover, TRBs appropriated for new UH academic buildings in Sugar Land and Katy will enhance the university's ability to reach students in two of the fastest growing regions of the Houston metropolitan area. The University of Houston is grateful to the Legislature for this support.

Committed to Community Advancement: A Highly Engaged Community Partner

Among Texas universities, UH stands out as a metropolitan university whose mission is focused on advancing the community in which it is located. Houston is becoming a national model for ethnic, socioeconomic, and cultural diversity, and UH is a highly engaged community partner. UH's estimated impact on the Houston economy exceeds \$3 billion per biennia. UH's impact, however, extends far beyond the Houston metropolitan area—our reach is truly worldwide.

Apart from its direct economic impact, the University of Houston provides many programs that enhance the quality of life in Houston and beyond. Among them are the Hobby School of Public Affairs, the Health Law and Policy Institute, and the Texas Institute for Measurement, Evaluation and Statistics (TIMES), which addresses one of Texas' and the nation's most important challenges – the English reading skills of elementary school students for whom English is not their primary language. In addition to the TIMES program, UH has developed other strong partnerships and programs with public schools and community colleges in our region to enhance the academic skills of students, support teacher professional development, and produce more STEM educators. The success of these programs has been based in part on

Automated Budget and Evaluation System of Texas (ABEST)

730 University of Houston

special item funding from the state. Building upon our programs in education and community advancement is also central to the University of Houston's Tier One goals.

UH 2018-19 Legislative Priorities

None of the accomplishments the University of Houston has made in the areas of student success, national competitiveness, and community advancement would have been possible without strong support from the Texas Legislature. As we look to the 85th session, we will again seek the investments from the state needed to build on the momentum achieved over the past several years. We ask that the Legislature give strong consideration to the University of Houston's priorities for the session, given the importance of higher education to the future of Texas.

I. ADEQUATE AND FAIR FUNDING FOR STUDENTS

1. Base Formula Funding

As demands on our universities grow, it is imperative to provide adequate resources for basic educational services through the formulas. Without sufficient base formula funding, universities will not be able to accommodate enrollment demand through course delivery; we will not be able to enhance program quality by recruiting and retaining exceptional faculty members; and we will not be able to enhance student success through academic support services. While the statewide formula funding rate for the FY 2016-17 biennium (\$55.39) was 1% higher than it was for the previous biennium, it was still 11% lower than the rate for the FY 2010-11 biennium (\$62.19). It is essential to close this gap. For the upcoming biennium, the University of Houston encourages the Legislature to provide funding consistent with the 2010-11 funding levels.

2. Financial Aid/TEXAS Grants

In addition to resources for university operations, state funding for student financial aid is essential if Texas is to expand access to higher education and facilitate student graduation. This is especially true at the University of Houston, where the education of many of our students is not paid for by their families. Rather our students typically work to pay for college and rely heavily on financial aid. Therefore, the University of Houston encourages the Legislature to increase funding for TEXAS Grants.

3. Hazlewood Exemptions

UH is committed to supporting veterans and their families by expanding opportunities for them to earn a college degree. To that end, UH funded \$8.8 million in Hazlewood exemptions in FY 2016. These costs increase each year, and most are absorbed at the institution level. Absent full state coverage, we must fund these exemptions through other resources, including tuition paid by other students. As the Comptroller of Public Accounts noted in August 2016, public colleges and universities are losing tuition revenue due to the exemption, and as a result "students without Hazlewood benefits are subsidizing those who have them." UH recommends that the state appropriate resources to cover all Hazlewood exemptions or modify the exemption.

4. Pharmacy Formula Funding

Currently, there is considerable disparity between the funding for Texas pharmacy programs that are funded through the health sciences formula versus those that are funded through the formula for general academic institutions. Programs at the general academic institutions (including the University of Houston, University of Texas at Austin, and Texas Southern University) receive significantly less funding on a per student basis for delivering the same curriculum. The University of Houston encourages the Legislature to appropriate additional funds to the pharmacy programs at the general academic institutions in order to achieve equity.

Administrator's Statement

85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

730 University of Houston

5. Restoration of 4% Base Reduction

As requested, UH's LAR reflects a 4% biennial base reduction. UH recognizes that state agencies and institutions of higher education must make difficult funding decisions given the state's economic forecast. Still, as noted above, formula funding has declined in real dollars, and the university bears significant costs in covering Hazlewood exemptions. Further reductions will negatively impact the university's ability to build upon past progress and achieve its short and long-term goals. The University of Houston encourages the Legislature, as much as is possible and prudent, to restore the reduction.

II. TIER-ONE INITIATIVES

1. State Funding for Research Programs for Tier One Universities

Combined, the Core Research Support Fund, Texas Research Incentive Program, National Research University Fund, and Governor's University Research Initiative constitute an innovative and powerful tool for enhancing and developing more nationally-competitive Tier One research universities. They are of critical importance to the continued growth of Texas' economy and advancement in significant areas of research and industry. They are also the primary resources through which UH and other universities not supported by the Permanent University Fund pursue their national competitiveness/Tier One goals. The University of Houston recommends increased appropriations to each of these funds.

2. Funding for Exceptional Items

Each year the Legislature funds numerous programs at the University of Houston that fall outside the scope of formula funding. These programs have a tremendous impact on our academic programs, research endeavors and the communities we serve. For FY18 and FY19, the University of Houston is requesting exceptional item funding for the following initiatives that directly support the university's goals of national competitiveness, student success, and community advancement (as described above).

Exceptional Items	Biennial Request
Partnership for Multicultural Success	\$2,565,750
Tier-One Initiative – Complex Systems	\$2,011,143
Restoration of 4% Biennial Base Reduction	\$1,355,312
Small Business Development Center	\$ 980,000

3. Funding for Small Business Development Centers

Small business development centers (SBDCs) are an important engine for economic development across the state and nation. For example, a recent independent impact study reported that as a result of businesses assisted in 2014, the UH SBDC contributed to the generation of over 5,000 new jobs, \$368 million in sales, and \$45 million in tax revenue. The University of Houston encourages the Legislature to continue its strong support for small business development centers.

Automated Budget and Evaluation System of Texas (ABEST)

730 University of Houston

Approach to 4 and 10 Percent Base Reductions

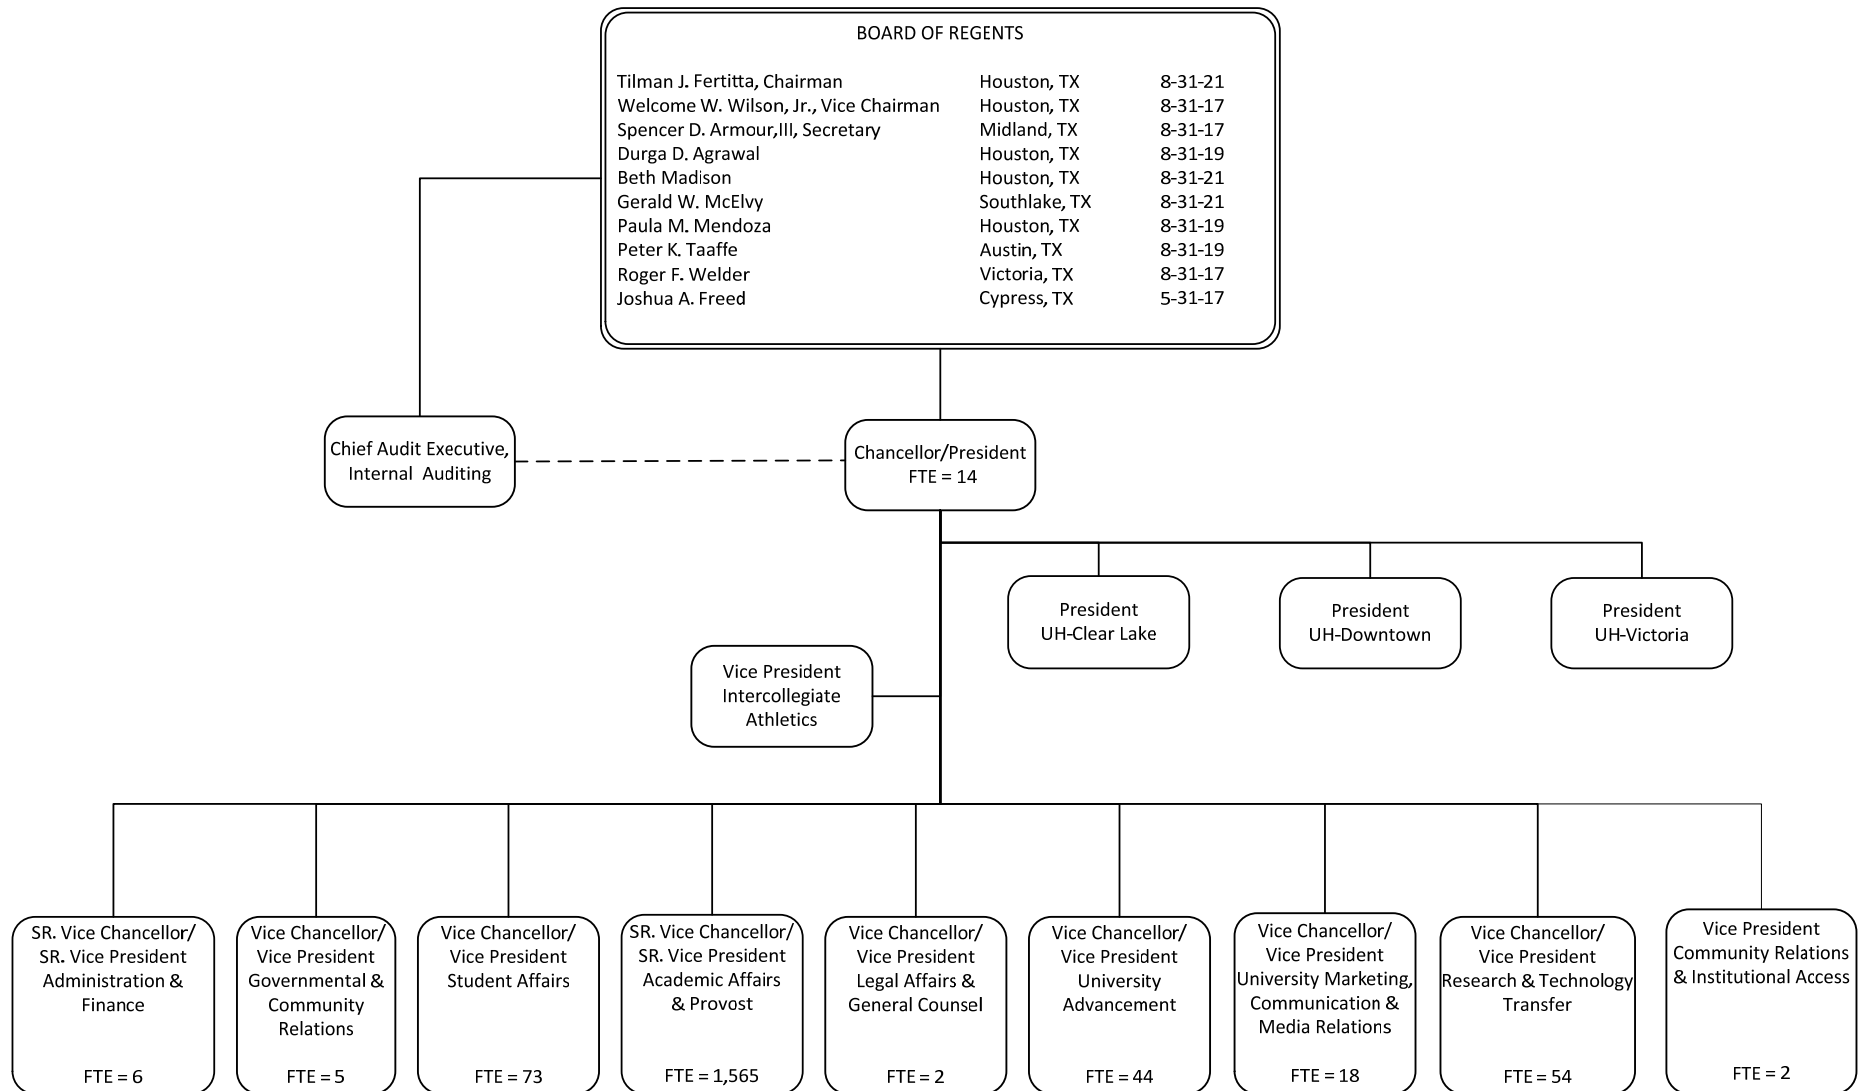

The University of Houston's LAR includes a 4% base reduction and a scenario for a 10% base reduction. For UH, these reductions total \$1.4 million and \$3.3 million respectively. The totality of lost funding would negatively impact the university's ability to achieve its goals. For UH, the choice was between absorbing the cuts in its special items, thereby impairing progress on the university's national competitiveness and community advancement goals, or absorbing the cuts in fund groups used to support the general operations of the university, thereby compromising the advancement of all of the university's goals. Ultimately, we decided to limit cuts to the latter (Institutional Enhancement, Worker's Compensation Insurance), thus requiring a higher reduction to special items.

Budget Area	4% Reduction	10% Reduction
Special Items	6.1%	14.7%
Institutional Enhancement/Worker's Comp	2.0%	5.0%

Maintaining College Affordability

While the University of Houston believes that increased state funding for higher education is important to the future of Texas, we also realize that universities must be good stewards of the dollars with which they are entrusted. UH is committed to this principle. Given increasing student debt nationwide, tuition and fee increases cannot be the primary strategy for maintaining institutional quality. Instead universities must optimize the use of existing resources and develop new revenue streams to achieve their goals. UH has made good progress on this front. Over the past several years, the university has eliminated non-essential services, consolidated departments, reduced expenses, and reallocated millions of dollars to pursue institutional priorities. As indicated earlier in this report, the university has also increased private support from \$49 million to \$120 million over the past eight years. These strategies have been critical to limiting tuition increases while at the same time improving student outcomes. Increased funding from the state during the current biennium has also allowed us to moderate tuition increases for the next two years. At UH, increases will be approximately 2%, which is generally consistent with inflation.

University of Houston System/University of Houston

FTE is budgeted FY2017 from Appropriated Funds; UH= 1,769 FTE, UHSA= 14 FTE, TOTAL= 1,783 FTE

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium.

------	-------------	----------	----------	----------	---------	---------

This is an item generated by a variety of formulas including replacement cost of buildings, gross square footage of educational, general and service buildings, fall student headcount and employee headcount. It covers salaries, wages, supplies, travel, equipment and other operating expenses to maintain campus property--including land and buildings. It also provides for physical plant administration and planning, and associated purchase and delivery of electricity, natural gas, or other energy sources, including steam and chilled water. This strategy request includes the direct cost of utility plant operations, purchase of water and wastewater services, and any debt service directly related to utilities operations. This does not include cost of utilities for auxiliary enterprises.

In fiscal year 2015 the institution recalibrated salaries to be more commensurate with current available funding sources. Approximately 200 FTE were moved from General Revenue Appropriation funds to institutional funding sources. In subsequent fiscal years, our goal is to restore space support staff funding from appropriated funds.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

Enhancing the University of Houston’s stature as a nationally recognized Tier One research university requires investment in its research programs in complex systems – the application of advanced computer, network and database technologies to address some of the nation’s most important challenges. At UH, scientists are incorporating the traditional disciplines of computer science, biology, chemistry, geology, engineering, and psychology among others into complex systems that address such diverse issues as air quality, homeland security, student learning, and space operations. Major UH programs conducting complex systems research include the Center for Advanced Computing and Data Systems; the Texas Institute for Measurement, Evaluation and Statistic; and the National Center for Airborne Laser Mapping. Investments in UH’s complex systems research programs enables the university to leverage external funding from industry and the federal government. In FY 2015, the university’s total research expenditures in complex systems totaled \$9.8 million.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The state of Texas has recognized that increasing the number of nationally competitive Tier One research universities is critical to the state’s economic future. With more Tier One universities, Texas will draw more top students, scientists and scholars to the state; improve the quality of its workforce, particularly in the sciences and engineering; and facilitate research partnerships with industry that lead to economic development. In 2011, the Carnegie Foundation for the Advancement of Teaching classified the University of Houston as a Tier One research institution. Similarly, in 2012 UH was identified as a Top American Research University by the Center for Measuring University Performance. These achievements would not have been possible without strong financial support from the state, including funding for the university’s complex systems research programs appropriated through this special item.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Enhancing the University of Houston’s stature as a nationally recognized Tier One research university requires investment in its energy research programs, which represent one of the university’s major areas of strength. Located in the energy capital of the world, UH has built partnerships with international companies and developed research programs that focus not only on oil and gas but on electricity, alternative energy sources, conservation and air quality. Signature UH energy programs include the Texas Center for Superconductivity, the TeSUH Applied Research Hub, the Center for Advanced Materials, the Texas Diesel Testing and Research Center, and the Energy Research Park – a 64-acre complex that serves as the cornerstone for UH’s academic/research programs, industrial partnerships, professional training, and economic development activities related to energy. Investments in UH’s energy programs enable the university to leverage external funding from industry and the federal government. In FY 2015, the university’s total research expenditures in energy programs totaled \$21.5 million.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

The Hobby Center for Public Policy (HCPP) began its transition to the Hobby School of Public Affairs (HSPA) in 2015. The Master of Public Policy (MPP) program started with classes preparing graduate students for careers in the public and private sectors through the development of quantitative skills and knowledge of theory and ethics, the use of multidisciplinary technical abilities, summer internships, and teaching soft skills such as teamwork. HSPA addresses the reality that Houston was the only major city in the nation without a public affairs school at a major public research university, and it leverages the city’s diverse population, its status as an economic leader in the global economy, and its ability to serve as a laboratory for policy innovation. Through real-world research projects, graduate student training, undergraduate internship and professional training programs, community partnerships, workshops and special events, HSPA connects decision makers with objective analyses and graduates appropriate for serving local, state, national and international entities within the public realm and the private sector. HSPA’s distinctive education, research and outreach mission allows for new avenues for private funding and federal grants.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

A report by the McKinsey Global Institute states there is a shortage of 140,000 to 190,000 people with advanced analytical skills and a lack of 1.5 million managers and analysts with the skills to analyze data to make effective decisions. Funding for HSPA ensures that the demand for an appropriately trained workforce is met. Solutions developed by the HSPA will benefit not only Houston, but other cities in Texas and in the nation that share similar challenges. Without special item funding, HSPA would terminate much of its present research and other on-going projects, resulting in a loss of basic public policy research capability for the Houston region. It would not be able to meet its research obligations with partners such as Rice University and Texas A&M University nor funding entities such as the National Science Foundation. Dual degree programs, which are a cost-effective option for students, would be delayed or not initiated. The polling and visualization capabilities offered to public and private sector entities would be greatly cut back or discontinued. Education, training and leadership programs would be curtailed or abolished, decreasing public service and employment opportunities for undergraduate and graduate students. Community partnerships and projects would be discontinued. The nationally accredited Certified Public Manager Program would cease at UH. The elimination of HSPA’s major programs would result in a multi-million dollar loss of private funding of its unique programs as well as positive visibility for UH, Houston and the state of Texas.

The University of Houston Small Business Development Center was established in 1984 under a cooperative agreement with the US Small Business Administration. As one of the preeminent SBDCs in the country and a flagship of small business assistance in Texas, the UH SBDC's central focus is providing quality assistance to the small business community by increasing growth and survivability. The UH SBDC accomplishes its mission by providing free one-on-one business counseling, low-cost business seminars, government procurement assistance, international trade, and technology development. The UH SBDC has had a very successful positive economic impact on Houston and the surrounding communities, particularly in the area of job creation. An annual independent impact study completed in 2016 for businesses assisted in 2014 showed that clients who received five or more hours of counseling from the SBDC generated over \$368.1 million in new sales and 5,333 new jobs. In addition, the same survey indicated that SBDC assistance helped clients obtain \$192.2 million in start-up and expansion capital, and generate new tax revenues of \$44.7 million, of which \$30.7 million went to the State of Texas.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

The Small Business Development Center special line item funding is used as a cash match to federal contracts. Without this funding from the State, over \$2.9 million in federal funds and approximately \$1.1 million in other local community funds and program income would be lost annually. State and local economic impact in terms of job creation and tax revenues due to the loss of SBDC services would be felt in the Houston area as well as in the surrounding communities served by our 10 network partners such as Angelina College, Blinn College, Brazosport College, Lamar State College, Lamar University, Lee College, Lone Star College, Prairie View A&M University, Sam Houston State University, and San Jacinto College, as well as those who are funded by UH through our SBA cooperative agreement.

The loss of SBDC services to the Houston and Gulf Coast business communities would have a dramatic negative impact as tens of thousands of start-up entrepreneurs and existing business owners would be unable to access low-cost professional business services. Based on historical data, sales growth, job creation, and capital expansion would be significantly reduced. The combination of the above factors would cause declining tax revenues and job expansion, with our two most recent impact studies suggesting possible cumulative loss of approximately \$61 million in state tax revenues as well as approximately 11,000 new jobs over the biennium.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Enhancing the University of Houston’s stature as a nationally recognized Tier One research university requires investment in its health sciences research programs, which represent one of the university’s major areas of strength. Located in one of the world’s premier cities for health care and research, UH has developed strong partnerships with other member institutions of the Texas Medical Center, launched new programs in Biomedical Engineering and Nursing, and opened a new Health and Biomedical and Sciences Building. A second health and biomedical sciences building is currently under construction. Major UH programs conducting health-related research include the Texas Center for Superconductivity, the Center for Advanced Materials, the Center for Advanced Computing and Data Systems, and the Health Law and Policy Institute, in addition to UH’s Colleges of Optometry and Pharmacy. Investments in UH’s health sciences programs enables the university to leverage external funding from industry and the federal government. In FY 2015, the university’s total research expenditures in the health sciences totaled \$30 million.

------	-------------	----------	----------	----------	---------	---------

The state of Texas has recognized that increasing the number of nationally competitive Tier One research universities is critical to the state’s economic future. With more Tier One universities, Texas will draw more top students, scientists and scholars to the state; improve the quality of its workforce, particularly in the sciences and engineering; and facilitate research partnerships with industry that lead to economic development. In 2011, the Carnegie Foundation for the Advancement of Teaching classified the University of Houston as a Tier One research institution. Similarly, in 2012 UH was identified as a Top American Research University by the Center for Measuring University Performance. These achievements would not have been possible without strong financial support from the state, including funding for the university’s health sciences research programs appropriated through this special item.

------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

Enhancing the University of Houston’s stature as a nationally recognized Tier One research university requires investment in its education and community advancement programs. As Texas’ premier metropolitan research university, UH has developed research and outreach programs that address the major challenges facing our cities and state. Specific areas of expertise include economic development; social issues such as substance abuse, aging, immigration, child welfare, health services and homelessness; and all levels of education. Signature programs at UH include the Health Law and Policy Institute, the Hobby School of Public Affairs, and the Texas Institute for Measurement, Evaluation and Statistics (TIMES), which focuses on the evaluation and improvement of the English reading skills of elementary school students for whom English is not their first language. Investments in UH’s education and community advancement research programs enables the university to leverage funding from external sources, including the federal government. In FY 2015, the university’s total research expenditures in education and community advancement totaled \$28.7 million.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The state of Texas has recognized that increasing the number of nationally competitive Tier One research universities is critical to the state’s economic future. With more Tier One universities, Texas will draw more top students, scientists and scholars to the state; improve the quality of its workforce, particularly in the sciences and engineering; and facilitate research partnerships with industry that lead to economic development. TOTAL, METHOD OF FINANCING			\$677,656	\$677,656

DESCRIPTION / JUSTIFICATION:

UH requests restoring the 4% biennial base reduction. If implemented, the reduction would be taken primarily from special items that are used to support UH's research enterprise (energy, health sciences, complex systems, education and community advancement) as well as the Hobby School of Public Affairs. In addition, it would limit funding for university operations.

Enhancing UH's stature as a nationally recognized Tier One research university requires investment in its research programs. Funding for these items is used to develop the infrastructure and support the operations of UH's research programs in order to leverage external funding from the federal government, industry, and other grant making institutions. UH's progress as a Tier One university is measured in large part by its research activity. Since 2008, UH's research expenditures have increased from \$73.5 million to \$150.6 million. Restoring these funds would allow UH to leverage additional research dollars and advance its position as a Tier One institution.

4.A. Exceptional Item Request Schedule
 85th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/18/2016
 TIME: 8:20:55AM

Agency code: 730

Agency name:
University of Houston

CODE	DESCRIPTION	Excp 2018	Excp 2019
-------------	--------------------	------------------	------------------

The Hobby School of Public Affairs provides non-partisan policy analysis and research for the region and state. Until recently, Houston was the only major city in the nation without a public affairs school at a major public research university. Restoring funds for this special item would allow the school to conduct survey, public policy, and other research and to continue to establish itself as a school of public affairs, a transition which began in 2015.

Finally, more funds would also be available to fund operations that support the university's primary mission: the delivery of educational programs.

EXTERNAL/INTERNAL FACTORS:

The state of Texas has recognized that increasing the number of nationally competitive Tier One research universities is critical to the state's economic future. With more Tier One universities, Texas will draw more top students, scientists and scholars to the state; improve the quality of its workforce; and facilitate research partnerships with industry that lead to economic development.

Reducing special item funding would slow the university's research efforts and progress as a nationally competitive research institution. Many of these reductions are in areas of research excellence like energy and health sciences that are critical to the Houston and state economy. Finally, this reduction would slow the development of the Hobby School of Public Affairs and limit university operations during a period of record enrollment. UH encourages the Legislature, as much as is possible and prudent, to restore the reduction.

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

To maintain special item funding.

FULL-TIME EQUIVALENT POSITIONS (FTE):		4.50	4.50

DESCRIPTION / JUSTIFICATION:

The University of Houston requests funding for the Texas Center for Geodetic Imaging and Mapping, a center of excellence for research and education that provides on-demand, 4-dimensional imaging of Texas' terrain, streams, and near shore waters. The center is part of UH's Complex Systems research, which applies advanced computer, network and database technologies to address some of the nation's most important challenges.

The center will use state-of-the-art remote sensing/geosensing technologies, including aerial digital photography, hyperspectral imaging, and space/aircraft based radar, to produce high resolution, 4 dimensional images and digital elevation models.

These models can be applied to address many challenges confronting the State of Texas. These include: planning for and responding to population growth, businesses, and industry; documenting and responding to natural and man-made disasters including hurricanes, floods, wildfires, and toxic chemical and petroleum spills; and developing and maintaining transportation networks including highways and railways.

The center's products may be used by: state and local governments; school districts; institutions of higher education; and private sector companies. The Texas Center for Geodetic Imaging and Mapping will draw on the technological expertise and share equipment with the National Center for Airborne Laser Mapping (funded by the National Science Foundation and located at UH) to educate students and to prepare them for the growing numbers of jobs that require geospatial knowledge.

EXTERNAL/INTERNAL FACTORS:

Texas is a fast-growing state with a number of challenges. As aerial and other mapping becomes more advanced, they can help state and local leaders make important decisions. For example, as Texas' population centers expand, urban planners can use rich, multi-dimensional images to decide where to construct buildings and infrastructure.

University of Houston

CODE	DESCRIPTION	Excp 2018	Excp 2019
-------------	--------------------	------------------	------------------

The state has also been hit by a number of natural and man-made disasters in recent years, including wildfires, floods, tornadoes, and the West fertilizer plant explosion. The Texas Center for Geodetic Imaging and Mapping would be well-equipped to help the state identify disaster-prone areas (such as floodplains), mitigate future disasters, and better respond to disasters. As the state updates and maintains its transportation network, the center offers real-world tools that can assist in planning and constructing roads, bridges, ports, and rail lines.

Finally, UH is committed to producing a 21st century workforce that meets the needs of the state and Greater Houston region. The center will train students and so they can get high-skilled jobs that require geospatial knowledge.

DESCRIPTION / JUSTIFICATION:

The UH SBDC proposes to maximize new job creation through the creation of a High Growth Stage 2 Business Team. The SBDC will expand services to include a specialty team focusing on Stage 2 businesses who typically employ 10-99 employees, have annual revenue of \$500k to \$50 million, provide substantial products and services outside the company's geographical location, and have a growth commitment. These firms are ripe for economic and job growth (educated and well paid talent) and are excellent opportunities for investment. The SBDC Stage 2 Business Team will focus on recruitment, expansion capital, partnering, growth strategies and coaching for strategic planning, leadership, and technical skills and resources. High Growth Stage 2 Business Team client objectives would be to (a) Recruit and develop 40-50 new business clients each year, (b) Support capital infusion of \$50-100 million annually, (c) Grow job creation by 1,000 at peak on average annual basis, and (d) Increase sales growth by double digits on average annual basis.

EXTERNAL/INTERNAL FACTORS:

The greater Houston area has benefited from a strong economy, a multitude of high quality educational institutions, a well trained workforce, a pro-business environment, and population growth from both within the United States and from around the world. Over the past five years, the combination of these positive influences have fostered thousands of new businesses, of which, a number are near or reaching Stage 2 status. These potential high growth firms need advanced advice and counsel focused on leadership thinking towards growth, vision, market expansion and analysis, technical and management skills, and partnering within the marketplace to access opportunities. We see a huge opportunity for the SBDC to provide these critical growth elements and expand with these firms to create large numbers of new jobs.

FULL-TIME EQUIVALENT POSITIONS (FTE):		10.00	10.00

DESCRIPTION / JUSTIFICATION:

Houston is a diverse, global city and international business hub. The University of Houston’s student population reflects this reality: no ethnic group constitutes a majority of our students, and 1 in 10 are international. To meet the needs of our campus and region, UH requests funding to expand its cultural and diversity programs. UH is home to several programs including Mexican-American, Asian-American and African-American Studies that focus on the vibrant cultures of our city, state, and world.

The Partnership for Multicultural Success will offer the following activities: 1) improving academic outcomes in minority communities (e.g. high school graduation/college enrollment rates, scholarships, etc.); 2) community engagement (e.g. lectures, festivals, and cultural events); 3) scholarly research (e.g. symposiums, publications, and scholars-in-residence); 4) professional development (e.g. internships, certification programs, mentoring); and 5) academic enrichment (e.g. courses, study abroad, etc.).

EXTERNAL/INTERNAL FACTORS:

Greater Houston is one of the most ethnically diverse and international regions in the nation. More than 60% of residents are minorities, and no racial or ethnic group makes up a majority of the population. The population is expected to reach 8 million by 2030. By then, more than half of young and college-age residents will be Hispanic. One in four will be African-American, Asian-American, or from another minority group.

The future of higher education in Houston and Texas depends on meeting the needs of historically under-represented students. According to the Texas Education Agency, Hispanic high school graduates lag behind other groups in terms of going to a 4-year college. In Fall 2014, just 17% of Hispanic high school graduates enrolled in a Texas public university, the lowest rate among racial and ethnic groups.

At the same time, achieving professional success is often more challenging for members of minority and international communities due to cultural, linguistic and economic

	Total Expenditures		28.4%		\$81,907,200	\$288,137,581		18.8%		\$43,094,778	\$229,207,806	

B. Assessment of Fiscal Year - Efforts to Meet HUB Procurement Goals

Attainment:

If FY2014, the University of Houston attained the statewide HUB goal in three out of five procurement categories that had expenditures, and in two out of five categories with expenditures in FY2015.

Applicability:

The University of Houston does not build roads or bridges so the Heavy Construction category is not applicable to UH.

Factors Affecting Attainment:

In both FY2014 and FY2015, the UH HUB goals for Other Services and Professional Services were not met in large part because those categories included contracts awarded to non-HUB vendors following a competitive procurement process in which HUB vendors were invited to participate. Most prime contractors in the Other Services and Professional Services categories did not utilize subcontractors. In FY2015, the Special Trade HUB goal was not met due to a decrease in HUB subcontracting during this period. After several years of robust construction spending on new building projects, UH construction spending slowed down in FY2015 to half the level it was in FY2014, which reduced UH HUB expenditures in the Building Construction category by \$35 million from FY2014 to FY2015, though UH still managed to meet the percentage HUB goal for Building Construction in FY2015.

"Good-Faith" Efforts:

University of Houston HUB outreach and compliance activity increased significantly in FY2015. After hiring Maya Thornton, HUB Director, in July 2014, UH added two HUB Specialists to assist Maya with HUB activities. The UH HUB program was audited by the State Auditor's Office during FY2015 and received a "substantially compliant" rating. Since the audit looked back at FY2014, the auditors did not consider the improvements made by Maya in FY2015 prior to the audit. However, all of the auditor's recommendations have been implemented. The increased focus that UH is placing on its HUB program will help broaden the use of HUB vendors in the coming years.

730 University of Houston

Special Item: 1 **Restoration of 4% Biennial Base Reduction**

(1) Year Special Item: 2018
Original Appropriations: \$677,656

(2) Mission of Special Item:

UH requests restoring the 4% biennial base reduction which was primarily taken from special items that support research excellence as well as the Hobby School of Public Affairs and university operations. These special items fund research operations in energy, health sciences, education and community advancement, complex systems, and public policy as well as university operations.

(3) (a) Major Accomplishments to Date:

Strong support from the Legislature has enabled UH to make significant progress in enrollment, research productivity, and graduation rates. Since FY 2008, enrollment has increased from 34,663 to 43,778, and degrees awarded increased from 6,961 to 9,160. Research expenditures increased from \$73.5 million to \$150.6 million. UH's graduation rate rose from 43% to 51%. The freshman median SAT score is 1150—nearly 100 points higher than eight years ago. These and other accomplishments have increased the university's standing as a Tier One institution as recognized by the Carnegie Foundation for the Advancement of Teaching, Top American Research Universities (TARU), and other organizations. Finally, the Hobby Center for Public Policy began its transition to the Hobby School of Public Affairs (HSPA) in 2015. HPSA now serves graduate students, provides professional development, conducts public policy research, and offers public events and lectures.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

If funding is restored, UH expects to leverage more external research funding, deliver more education programs, and attract, retain, and graduate more highly-qualified students. Since 2008, enrollment has grown approximately 3% on average each year, a trend we expect to continue. UH's six year graduation rate is on track to pass 60% by 2020.

(4) Funding Source Prior to Receiving Special Item Funding:

NA

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

730 University of Houston

(8) Non-general Revenue Sources of Funding:

NA

(9) Consequences of Not Funding:

UH's progress as a Tier One university is measured in large part by its research activity. Reducing special item funding would slow the university's research efforts and progress as a nationally competitive research institution. Many of these reductions would be in areas of research excellence like energy and health sciences that are critical to the Houston and state economy. Finally, this reduction would slow the development of the Hobby School of Public Affairs and limit university operations during a period of record enrollment. UH encourages the Legislature, as much as is possible and prudent, to restore the reduction.

730 University of Houston

Special Item: 2 **Tier One Initiative – Energy Research**

(1) Year Special Item: 2008
Original Appropriations: \$2,500,000

(2) Mission of Special Item:

The Energy Research special item is used to develop the infrastructure and support the operations of University of Houston energy research programs, in order to leverage external funding from the federal government, industry and other grant making institutions. Energy is one of UH’s research strengths and key to its goals as a nationally competitive Tier One research university.

(3) (a) Major Accomplishments to Date:

In FY 2015, total research expenditures in energy programs were \$21.5 million. Significant progress has been made in developing the UH Energy Research Park – a 64-acre complex that now serves as the cornerstone for UH’s academic/research programs, industrial partnerships, professional training, and economic development activities related to energy. The university has also established new energy-related academic and research programs in Petroleum Engineering and Subsea Engineering.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Over the next two years, resources will continue to be invested in the development of the university’s key energy research programs, including the Texas Center for Superconductivity, the TcSUH Applied Research Hub, and the Center for Advanced Materials, all of which have proven tremendously successful to date and for which there is great potential in the future with respect to research productivity and economic development.

(4) Funding Source Prior to Receiving Special Item Funding:

NA

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

Fiscal Year	Amount	Source
2015	\$21.5M	Federal government, industry, other grant-making organizations
2016	\$22.8M	Federal government, industry, other grant-making organizations

730 University of Houston

2017	\$23.5M	Federal government, industry, other grant-making organizations
2018	\$24.2M	Federal government, industry, other grant-making organizations
2019	\$24.9M	Federal government, industry, other grant-making organizations

(9) Consequences of Not Funding:

Not funding this special item would reduce the university's ability to invest in its energy research programs and the external funding that would be leveraged. It would also slow the university's progress as a nationally competitive Tier One research institution.

730 University of Houston

Special Item: 3 **Tier One Initiative – Health Sciences**

(1) Year Special Item: 2012
 Original Appropriations: \$2,500,000

(2) Mission of Special Item:

The Health Sciences special item is used to develop the infrastructure and support the operations of University of Houston health-related research programs, in order to leverage external funding from the federal government, industry and other grant making institutions. The health sciences are one of UH’s research strengths and key to its goals as a nationally competitive Tier One research university.

(3) (a) Major Accomplishments to Date:

In FY 2015, total research expenditures in the health sciences were \$30 million. Over the past two years, the University of Houston has launched a School of Nursing and begun construction of a second health and biomedical sciences building, which will house the UH College of Pharmacy, research labs, and clinical programs. UH programs conducting health-related research include the Texas Center for Superconductivity, the Center for Advanced Computing and Data Systems, and the Health Law and Policy Institute.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

With continued investments in research faculty, staff, facilities, equipment and operations, the University of Houston expects continued growth in research productivity in the health sciences.

(4) Funding Source Prior to Receiving Special Item Funding:

NA

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

Fiscal Year	Amount	Source
2015	\$30.0M	Federal government, industry, other grant-making organizations

730 University of Houston

2016	\$31.8M	Federal government, industry, other grant-making organizations
2017	\$32.8M	Federal government, industry, other grant-making organizations
2018	\$33.7M	Federal government, industry, other grant-making organizations
2019	\$34.7M	Federal government, industry, other grant-making organizations

(9) Consequences of Not Funding:

6. Consequences of not funding: Not funding this special item would reduce the university's ability to invest in its health sciences research programs and the external funding that would be leveraged. It would also slow the university's progress as a nationally competitive Tier One research institution.

730 University of Houston

Special Item: 4 **Partnership for Multicultural Success**

(1) Year Special Item: 2018
Original Appropriations: \$1,282,875

(2) Mission of Special Item:

UH requests funding to expand its cultural and diversity programs to meet the needs of our campus and region. UH is home to several programs including Mexican-American, Asian-American and African-American Studies that focus on the vibrant cultures of our city, state, and world.

The Partnership for Multicultural Success will offer the following activities: 1) improving academic outcomes in minority communities (e.g. high school graduation/college enrollment rates, scholarships, etc.); 2) community engagement (e.g. lectures, festivals, and cultural events); 3) scholarly research (e.g. symposiums, publications, and scholars-in-residence); 4) professional development (e.g. internships, certification programs, mentoring); and 5) academic enrichment (e.g. courses, study abroad, etc.).

Houston is a diverse, global city and international business hub. The University of Houston's student population reflects this reality: no ethnic group constitutes a majority of our students, and 1 in 10 is international.

(3) (a) Major Accomplishments to Date:

Between Fall 2007 and Fall 2015, minority enrollment grew from over 18,000 students to over 26,000. Hispanic enrollment grew by 75%. UH has been designated as a Hispanic Serving Institution by the U.S. Department of Education.

From FY 2008-15, the number of minority degrees awarded increased from 1,907 to 3,222—nearly 70%. UH is leading the way in closing the achievement gaps of underrepresented students. From FY 2012-15, the 4-year graduation rate for African-American and Hispanic students increased by 11 and 7 percentage points respectively. They are now close to the graduation rate of white students.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

UH expects to enroll and graduate more minority students. We also expect minority students' graduation rates will continue to improve, and special item funding would further this trend. Finally, Greater Houston will continue to be a national model for cultural, ethnic, and economic integration.

(4) Funding Source Prior to Receiving Special Item Funding:

NA

(5) Formula Funding:

N

(6) Startup Funding:

N

730 University of Houston

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

NA

(9) Consequences of Not Funding:

Greater Houston is experiencing dramatic demographic changes. An increasing number of its students and working professionals are non-white. Not funding this item would limit the ability of UH to provide programs that would facilitate greater student success, professional development, and economic and cultural integration.

730 University of Houston

Special Item: 5 **Small Business Development Center**

(1) Year Special Item: 1984
Original Appropriations: \$200,000

(2) Mission of Special Item:

The UH Small Business Development Centers provide the tools and resources to help small regional businesses start, grow, and succeed. Through two core services, free one-on-one management consulting and low-cost business training seminars, the SBDC helps new entrepreneurs start their business, existing business owners attract customers, increase sales, and improve operations, and assists clients in obtaining capital to open or expand their business. The UH SBDC also offers specialized consulting and training in government contracting, assisting business owners obtain State, local, and federal government contracts.

(3) (a) Major Accomplishments to Date:

Through 15 service centers located within its 32 county Gulf Coast region, the UH SBDC has had a very successful positive economic impact on Houston and the surrounding communities, particularly in the area of job creation. An annual, independent impact study completed in calendar 2016 for businesses assisted in calendar 2014 showed that clients who received five or more hours of counseling from the SBDC:

- *Created 5,333 new jobs, with a 3 year total from 2012 through 2014 of 13,480 new jobs
- *Generated over \$368.1 million in new sales
- *Retained 2,385 jobs. \$266.1 million in sales were saved
- *Generated new tax revenues of \$44.7 million, consisting of \$30.7 million in State taxes, and \$14 million in federal taxes
- *Obtained \$192.2 million in new capital financing

During FY 2015, the SBDC:

- * Provided 26,175 training hours over 520 classes to 7,132 entrepreneurs
- *Provided 37,235 advising hours to 5,513 clients

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Our purpose is to strengthen small businesses so that they will contribute to the economic vitality of our communities through job creation and retention. We continue to provide small companies with assistance in obtaining financing and government contracts to begin or expand their business, as well as help start-up and existing businesses evaluate and implement business solutions to improve survivability, growth potential, and new employment opportunities. The University of Houston Small Business Development Center (UH SBDC) Network has a strong history of meeting or exceeding all program objectives and milestones, and we anticipate again achieving high economic impact results. Our premier small business training facility offers educational programs for small business in a group setting. In 2016, the UH SBDC completed a major renovation of its training facility in downtown Houston, expanding its training capacity. The audiovisual system was also upgraded, enhancing its capabilities for streaming and recording classes and seminars for the small business community. With the expansion, we anticipate increases in the number of entrepreneurs we train, as our class offerings increase. This in turn will provide an increased client pipeline for potential program impact. The UH SBDC is also forming new strategic alliances with local partners to provide outreach more efficiently and effectively to the small businesses within our 32 county region.

730 University of Houston

(4) Funding Source Prior to Receiving Special Item Funding:

Federal and University funding.

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

Fiscal Year	Amount	Source
2016	\$2,962,982	Federal & Local Government support
	\$1,121,073	Private Sources, including partner match, program income
2017	\$2,840,944	Federal & Local Government support
	\$1,191,356	Private Sources, including partner match, program income
2018	\$2,840,944	Federal & Local Government support
	\$1,200,000	Private Sources, including partner match, program income
2019	\$2,840,944	Federal & Local Government support
	\$1,200,000	Private Sources, including partner match, program income

(9) Consequences of Not Funding:

The UH SBDC would be unable to meet the cost-sharing provisions of its two core federal awards with a total funding loss to the SBDC network of more than \$4 million of non-general revenue funding annually, and would essentially result in the demise of the UH SBDC program. In addition to the current federal awards that require cost-sharing, our state funds have been used in the past to apply for additional federal funding from both the SBA and other federal agencies to assist small businesses, that if awarded, would significantly contribute to UH's efforts to enhance Tier One research status. The loss of SBDC services to Houston and the Gulf Coast business community would have a dramatic negative impact, as thousands of start-up entrepreneurs and existing business owners, who cannot or would not seek business counseling from the private sector, would be unable to access professional business services. Based on historical data, sales growth, job creation, and capital expansion would be significantly reduced. The combination of the above factors would certainly cause declining tax revenues as well as the loss of existing jobs and the reduction of new job creation.

730 University of Houston

Special Item: 6 **Hobby School of Public Affairs**

(1) Year Special Item: 2014
Original Appropriations: \$2,200,000

(2) Mission of Special Item:

The University of Houston seeks funding to expand the services of the Hobby School of Public Affairs (HSPA). HSPA provides an innovative, multi-disciplinary Master of Public Policy degree emphasizing quantitative methods with a solid foundation of ethics and applied skills, and its research division and programs offer resources to assist government and businesses in making sound decisions and in recruiting trained employees. Through graduate education, research projects, undergraduate internships, professional training, dual degree options, public lectures, and events, HSPA prepares its students with the skills necessary to excel in the real world of the 21st century.

(3) (a) Major Accomplishments to Date:

The Hobby School of Public Affairs offers a multi-disciplinary Master of Public Policy (MPP) degree; provides objective, non-partisan analyses; conducts advanced research training; provides leadership training through its professional certification program and government internship programs; and builds impactful partnerships with the community. HSPA's research division has conducted applied research in areas such as state demographics, law enforcement, real estate and redistricting and has obtained grants from the National Science Foundation and local entities. The Survey Research Institute provides public opinion surveys and data on topics for clients including universities such as Rice University and Texas A&M University, state agencies, local governments, and various civic organizations. The Concept Visualization Lab creates multi-dimensional visualizations and proto-types to display research findings in dynamic and interactive graphics. Hobby Fellows (Austin) and Leland Fellows (Washington) provides undergraduates the opportunity to work as full-time legislative interns. The Civic Houston Internship Program has placed more than 1300 students in federal, state, and local governmental offices, and the nationally accredited Certified Public Manager program serves working professionals. Campus-wide outreach is resulting in multi-disciplinary research papers on real-world challenges such as work/life conflicts, firefighter stress, and city performance evaluation.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Twenty-seven students are enrolled in the MPP program for the fall 2016 semester, with a target of adding 25 new students in 2017. HSPA is hiring tenured or tenure track faculty in quantitative methods (economics and political science), ethics (political theory and philosophy) and decision sciences (business, psychology and computer science) to expand its curriculum and research expertise. MPP students will provide a thorough research analysis of the Higher Education Board's 60/30 plan. A dual degree with the UH Graduate College of Social Work and a co-terminal degree with the UH Honors College will be launched. Leadership training will continue through civic engagement projects and governmental internships in Houston, Austin, and Washington. The Survey Research Institute will continue and increase its regional and state surveys of public attitudes. HSPA will increase its partnerships with local governments and non-profit organizations through new community participatory research projects, certificate programs, special events and workshops. HSPA's speaker series will serve as an educational outreach to the public. The HSPA summer institute will continue to train nationwide PhD candidates in research methods. Demographic workshops will be conducted for academics and non-profit professionals. Increased private fundraising efforts will augment the opportunities allowed by graduate student support and the government internship programs as well as endowed chairs and professorships

730 University of Houston

(4) Funding Source Prior to Receiving Special Item Funding:

Government grants from local and federal sources and contributions from private entities funded research and internships.

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

Fiscal Year	Amount	Source
2016	\$456,161	Private foundations, corporations, individual contributions, independent school districts, state and federal agencies, higher education institutions.
2017	\$456,161	Private foundations, corporations, individual contributions, independent school districts, state and federal agencies, higher education institutions.
2018	\$556,161	Private foundations, corporations, individual contributions, independent school districts, state and federal agencies, higher education institutions.
2019	\$556,161	Private foundations, corporations, individual contributions, independent school districts, state and federal agencies, higher education institutions.

(9) Consequences of Not Funding:

Without special item funding, the Hobby School of Public Affairs (HSPA) would terminate much of its present research and other on-going projects, resulting in a loss of basic public policy research capability for the Houston region. It would not be able to meet its research obligations with partners such as Rice University and Texas A&M University nor funding entities such as the National Science Foundation. Dual degree programs with other UH departments would be delayed. The polling and visualization capabilities offered to public and private sector entities would be greatly cut back or discontinued. Education, training and leadership programs would be curtailed or abolished, decreasing public service and employment opportunities for undergraduate and graduate students. Community partnerships and projects would be discontinued. The nationally accredited Certified Public Manager Program would cease at UH. The elimination of HSPA's major programs would result in a multi-million dollar loss of private funding of its unique programs as well as positive visibility for UH, Houston and the state of Texas.

730 University of Houston

Special Item: 7 **Tier One Initiative – Education & Community Advancement**

(1) Year Special Item: 2012
 Original Appropriations: \$750,000

(2) Mission of Special Item:

The Education and Community Advancement special item is used to develop the infrastructure and support the operations of UH’s education and community advancement research programs, in order to leverage external funding from the federal government, industry and other grant making institutions. Education and community advancement are one of UH’s research strengths and key to its goals as a nationally competitive Tier One research university.

(3) (a) Major Accomplishments to Date:

As Texas’ premier metropolitan research university, UH has developed research and outreach programs that address the major challenges facing our cities and state. Specific areas of expertise at UH include economic development; social issues such as substance abuse, aging, immigration, child welfare, health services and homelessness; and all levels of education. Signature programs include Teach Houston, the Hobby School of Public Affairs, and the Texas Institute for Measurement, Evaluation and Statistics (TIMES), which focuses on the evaluation and improvement of the English reading skills of elementary school students for whom English is not their first language. In FY 2015, total research expenditures in education and community advancement were \$28.7 million.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

With continued investments in research faculty, staff, facilities, equipment and operations, the University of Houston expects continued growth in research productivity in education and community advancement.

(4) Funding Source Prior to Receiving Special Item Funding:

NA

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

Fiscal Year	Amount	Source
2015	\$28.7M	Federal government, industry, other grant-making organizations

730 University of Houston

2016	\$30.4M	Federal government, industry, other grant-making organizations
2017	\$31.3M	Federal government, industry, other grant-making organizations
2018	\$32.3M	Federal government, industry, other grant-making organizations
2019	\$33.2M	Federal government, industry, other grant-making organizations

(9) Consequences of Not Funding:

Not funding this special item would reduce the university's ability to invest in its education and community advancement research programs and the external funding that would be leveraged. It would also slow the university's progress as a nationally competitive Tier One research institution.

730 University of Houston

Special Item: 8 **Tier One Initiative – Complex Systems**

(1) Year Special Item: 2012
 Original Appropriations: \$2,500,000

(2) Mission of Special Item:

The Complex Systems special item is used to develop the infrastructure and support the operations of University of Houston complex systems research programs, in order to leverage external funding from the federal government, industry and other grant making institutions. Complex Systems is one of UH's research strengths and key to its goals as a nationally competitive Tier One research university.

(3) (a) Major Accomplishments to Date:

Complex systems is the application of advanced computer, network and database technologies to address some of the nation's most important challenges. Currently, scientists are incorporating the traditional disciplines of computer science, biology, chemistry, geology, engineering, and psychology among others into complex systems that address such diverse issues as air quality, homeland security, student learning, and space operations. In FY 2015, total research expenditures in complex systems were \$9.8 million.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

With continued investments in research faculty, staff, facilities, equipment and operations, the University of Houston expects continued growth in research productivity in complex systems.

(4) Funding Source Prior to Receiving Special Item Funding:

NA

(5) Formula Funding:

N

(6) Startup Funding:

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

Fiscal Year	Amount	Source
2015	\$9.8M	Federal government, industry, other grant-making organizations

730 University of Houston

2016	\$10.4M	Federal government, industry, other grant-making organizations
2017	\$10.7M	Federal government, industry, other grant-making organizations
2018	\$11.0M	Federal government, industry, other grant-making organizations
2019	\$11.4M	Federal government, industry, other grant-making organizations

(9) Consequences of Not Funding:

Not funding this special item would reduce the university's ability to invest in its complex systems research programs and the external funding that would be leveraged. It would also slow the university's progress as a nationally competitive Tier One research institution.

730 University of Houston

Special Item: 9 **Institutional Enhancement**

(1) Year Special Item: 2000
Original Appropriations: \$1,781,305

(2) Mission of Special Item:

Institutional enhancement resources are used to fund the core operations of the university, including the delivery of instruction, support for students, support for the university's research activities and general administration. They are essential to achievement of the university's goals and its effective operation.

(3) (a) Major Accomplishments to Date:

Record degrees awarded: 9,160
Record freshman 1-year retention: 86%
Record freshman 6-year graduation rate: 51%
Record freshman median SAT: 1150
Record number of doctorates: 335
Record total research expenditures: \$151M
Record royalty income: \$26M
Record scholarly citations: 65,166

(3) (b) Major Accomplishments Expected During the Next 2 Years:

With continued Institutional Enhancement funding, the University of Houston expects to build upon enrollment, student success, degrees awarded, and research productivity achieved during the current biennium.

(4) Funding Source Prior to Receiving Special Item Funding:

NA

(5) Formula Funding:
